

Laminated Absorber

Description

RF absorber is utilized to reduce reflections within an RF shielded enclosure

Features

High performance multi layer, light weight, flat laminated microwave absorber
Made from homogeneous carbon impregnated open cell polyurethane foam layers
Specially impregnated and laminated with flexible adhesives and latex
Available in standard thickness from .25" to 9"
Standard attachment is adhesive optionally use Velcro attachment

Specifications

		AEL-0.25	AEL-.0.375	AEL-0.75	AEL-1.125	AEL-2.25	AEL-4.5	AEL-9.0
Thickness	in	0.25	0.375	0.75	1.125	2.25	4.5	9
Size	in	24 x 24						
Reflectivity at Normal Incidence	dB	>-20
